

Claims

What is claimed is:

1. A corrosion inhibitor composition comprising:
  - 5 (a) between about 90 and about 99 percent by weight ammonium benzoate; and
  - (b) one or more additive components in an amount of between about 1 and about 10 percent by weight of said composition, said one or more additive components being  
10 selected from the group consisting of silica, triazoles, and wetting agents.
2. A corrosion inhibitor composition as in claim 1 that is adapted to be dissolved in water in an amount  
15 necessary to form an aqueous solution having about 0.25 to about 5 percent by weight of said corrosion inhibitor composition.
3. A corrosion inhibitor composition as in claim 1  
20 that is water soluble.
4. A corrosion inhibitor composition as in claim 1 being adapted to be packaged in water soluble bags.
